Anger Management & Behaviour

A selection of books and DVDs from the four Trust Libraries

Overcoming Anger & Irritability

Dr William Davies

Constant irritability or flashes of bad temper can cause difficulties in relationships and leave us feeling unhappy and exhausted. This book is for anyone struggling to control their rage and regretting inappropriate reactions. It explains what provokes anger and what we can do to prevent it.

A Volcano in My Tummy

Eliane Whitehouse

This book presents an effective approach to helping children and adults understand and deal constructively with children's anger, using easy to understand skills for anger management. It offers activities which help to overcome the fear of children's anger which adult care-givers experience. By distinguishing between anger the feeling, and violence the behavior, this book, primarily created for ages 6 to 13, helps to create an awareness of anger, enabling children to relate harmoniously at critical stages in their development.

Art Therapy & Anger

Marian Liebmann

This book demonstrates how the non-verbal medium of art therapy provides an outlet for the expression of thoughts and feelings that are too complex and painful to put into words. Clients of all ages benefit from the art-making process, which helps them to slow down and consider their emotions more calmly. The tangible product of their efforts allows clients to assess and react to what they have depicted, providing a lucid and safe framework for understanding the causes and effects of their anger.

Understanding Anger Disorders

Raymond DiGiuseppe

Using clinical data and a variety of case studies, this book argues for a new diagnostic classification, Anger Regulation and Expression Disorder, that will help bring about clinical improvements and increased scientific understanding of anger. After situating anger in historical and emotional contexts, it reports research that supports the existence of subtypes of the disorder and review treatment outcome studies and new interventions to improve treatment.

Bullying At Work

Andrea Adams

Through personal accounts and revelations, this book explores bullying at work and offers solutions to help overcome this stressful, often isolating experience. Based on three years of research, Andrea Adams plots the destructive forces currently eroding the professional lives of many people. By tracing the psychological origins of bullying at work this book investigates the effect of past relationships on the present, providing both individuals and organizations with a deeper understanding of why things can go so badly wrong. Through advice and guidance, it offers a way forward for all those who value the need for psychological well-being at the workplace.

Women's Anger

Deborah Cox

Socialization and culture play key roles in shaping the unhealthy ways in which feminine anger is negotiated. This text reveals the complex nature of the anger experience for women and girls as both an internal phenomenon and in its interrelationships with interpersonal interactions and the broader social environment. The book brings together theoretical understandings, clinical experiences, empirical research, and the lived experience of anger for women and girls. It offers a combined focus on feminist and developmental perspectives on anger, the psychology of emotion, and applied theory.

Human Aggression

Russell Green

A fully revised and updated edition offering a brief introduction to the psychology of human aggression.

Of Course you're angry.

Gayle Rosellini

In a friendly, nonconfrontational manner, *Of Course You're Angry* guides readers to discover the source of their anger and the forms it takes – violence, depression, resentment, and manipulation.

Managing Anger

Helen O'Neill

The purpose of this manual is to provide a series of session plans to assist the therapist in leading a course of anger management treatment with individuals who have cognitive impairment. The technique of anger management has become a widely used intervention in a variety of forensic, general mental health and non-clinical settings.

Psychiatric & Behavioural Disorders in Intellectual & Developmental Disabilities

Colin Hemming & Nick Bouras

Fully revised, this new edition reviews the most up-to-date and clinically relevant information on the mental health and behavioral problems of people with intellectual, developmental and learning disabilities, also previously known as mental retardation.

Coping with aggressive behaviour

Glynis Breakwell

This book includes a summary of the psychological theories which have been produced to explain aggression. Offering practical advice on methods

for assessing dangerous situations and on developing personal and organizational strategies for coping with aggression, this book will be an invaluable tool towards controlling or constraining the aggression of others.

On Aggression

Konrad Lorenz

Through an insightful survey of animal behaviour, the Nobel Prize winner tracks the evolution of aggression throughout the animal world.

He also raises some startling questions when he applies his observations of animal psychology to humankind. Whether or not Lorenz actually claimed aggression is *hard-wired* into the human psyche, and that war is an inevitable result, is something readers can decide upon for themselves

Problematic & Risk Behaviours in Psychosis

Alan Meaden & David Hacker

This book investigates risk and problem behaviours in psychosis, including staff and service factors that can impede

the delivery of effective care.

Containment in the Community

David Reiss

This book is aimed at all practitioners working in healthcare and criminal justice community settings

with individuals displaying antisocial, offending, and challenging behaviours, at times complicated by severe mental disorders.

Challenging Behaviour

Steve Hardy & Theresa Joyce

This user friendly and accessible resource emphasises the importance of respecting

people using services, their families and carers. It aims to support those working in services, to empower service users and to improve the quality of care. The authors developed this material with every effort to adhere to the Charter that has been developed by the Challenging Behaviour - National Strategy Group.

Children and young people whose behaviour is sexually concerning or harmful

Jackie Bateman & Judith Milner

The sexual abuse of one child by another generates anxiety, puzzlement and confusion. This book provides an overview of the evidence relating to such problem behaviours, from inappropriate behaviour to sexual abuse. They propose research-based effective and creative methods that professionals can use to develop responsibility-taking and safety in the child. The authors show how behaviour can be managed through the development of safe care plans for the home and/or school. They also provide guidance for working across a range of settings.

Anger Management

DVD

Dave Buznik (Adam Sandler) is usually a mild-mannered nonconfrontational guy. But after an altercation aboard an airplane, he is remanded to the care of an anger-management therapist, Dr. Buddy Rydell (Jack Nicholson), who could probably use a little anger management himself.

Ghodse's Drugs & Addictive Behaviour

Hamid Ghodse

This book presents an international overview of substance misuse and dependence. There is emphasis on practical, evidence-based approaches to assessment and management, a new chapter on alcohol abuse, and the appendix provides clinical intervention tools.

People with Autism Behaving Badly

John Clements

This hands-on, practical manual is indispensable for families, carers and anyone involved with autistic people who need help with behavioral or emotional challenges. It offers effective, long-term strategies to help resolve common problem behaviors such as physical aggression, self-injury, verbal abuse, rudeness and property damage.

Keeping it Together

Peter Woodward

Written for support staff, working with people with learning disabilities, who are new to challenging behaviour or facing it for the first time, this self-help guide provides practical and realistic information on how direct care staff can develop strategies to support people whose behaviour is challenging and develop their skills in this area.
