

Using OpenAthens to Access Healthcare Databases, Full-Text Journals and e-Books

For your full list of NHS Athens resources go to <https://openathens.nice.org.uk/Auth/Login> then enter your Athens username and password in the signing in box.

The following page will then allow you to select which area you would like to search. Healthcare databases can be accessed via EBSCO, Ovid and Proquest.

From this page you can also change your Password, Email Address and the Organisation you work for, should you need to transfer your account.

More detailed information on how to search the clinical databases, e-books and access to full-text journals is available via the Library Service website at <https://cwpt.wordpress.ptfs-europe.co.uk/>

We also provide individual or group training sessions on searching the databases. Please email stmichaels.library@covwarkpt.nhs.uk for further information.
