Leadership: for nursing, health and social care students

L Jones and C Bennett

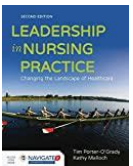

Offering practical advice underpinned by theoretical perspectives, this book explains principles of effective leadership and applies them to practice. You will learn: What leadership is and what skills and qualities you need to be an effective leader. To use leadership skills to influence outcomes. The importance of a leader as a catalyst for change. How leaders influence policy. How to identify your own strengths and weaknesses and create an action plan to develop your emerging leadership skills.

Leadership and Management in Healthcare

N Gopee

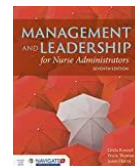

This book supports you from emerging registered healthcare professional to becoming a competent care manager. Action points, case studies and strong practice guidelines enable you to understand how leadership and management theory applies to the care deliver. New key topics such as dimensions of leadership, NHS Change Model, transition to registered practitioner and revalidation requirements, emotional intelligence and resilience, are also included.

Leadership in Nursing Practice

T Porter-O'Grady and K Malloch

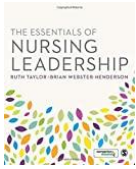

Provides nursing students with the leadership skill-set needed to enter the field. It distinguishes between leadership and management and emphasises translation applications that prepare you for transition into leadership roles. It covers topics including leadership, transitioning to the professional role, time management, finance/fiscal management, communication and negotiation, ethical decision making and career management.

Management and Leadership for Nurse Administrators

L Roussel, J Harris and T Thomas

Provides professional administrators and nursing students with an overview of management concepts and theories. Includes a focus on magnetism, specifically transformational leadership, structural empowerment, professional practice, innovation and improvement, and quality. It has a focus on planning and managing evidence-based initiative, phases of implementation, and evaluation methods.

The Essentials of Nursing Leadership

R Taylor and B Webster-Henderson

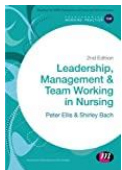

This book uses underpinning knowledge and theory of leadership skills and then practical skills to help students understand all aspects of leadership as a key component of providing quality care to patients. Key features: Real life focus, grounded in everyday practice, with case studies and examples. Activities help students reflect their own practice, and about themselves as leaders.

Professional Nursing Concepts: Competencies for Quality Leadership

A Finkelman and C Kenner

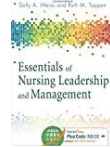

This book takes a patient-centred, traditional approach to nursing education. Topics include: success in nursing education; reflective learning and practice, inter-professional team reports, healthcare reform, accreditation standards, use of informatics, principles of leadership and management, the nurse's role in quality improvement.

Leadership, Management and Team Working in Nursing

P Ellis and S Bach

This book explains why leadership and management is important, how it fits with your daily practice and what the key theory and knowledge is. Key features: activities and case studies; Linked to NMC Standards and Essential Skills Clusters for pre-registration nursing education; Guidance on the immediate challenges that the new nurse will face.

Essentials of Nursing Leadership & Management (E-Book)

S Weiss and R Tappen

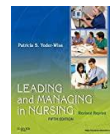

Prepares you for the challenges of a changing health care environment. You'll explore your responsibilities as a leader and manager and the workplace issues and trends you'll encounter in practice. Resources online include interactive case studies, review questions, bonus chapters, a resume template, sample letters and emails.

Becoming a Reflective Practitioner

C Johns

This text contains reflective extracts that support the main issues in each chapter, and asks practitioners and students to question their own practice. These extracts provide access to the experience of reflective representation helping to explicate the way in which reflective practice can inform the wider notion of professional practice.

Leading and Managing in Nursing

P Yoder-Wise

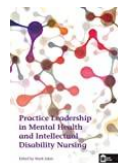

This text blends evidence-based guidelines with practical application. It prepares you for the nursing leadership issues of today and tomorrow, providing information you need to succeed on the NCLEX and in practice. Content includes patient safety, workplace violence, consumer relationships, cultural diversity, resource management

Practical Leadership & Management in Healthcare for Nurses & Allied Health Professionals

E Sullivan

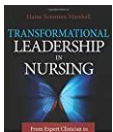

Provides analysis of the theories, models and skills of leading and managing and a basis for developing effective knowledge, skills and behaviours. Planning, organising, delivering and evaluating care are everyday management responsibilities, whilst anticipating patient needs and motivating others are ways of leading with integrity. It offers advice on making an impact as a leader, from frontline to boardroom.

Practice Leadership in Mental Health and Intellectual Disability Nursing

M Jukes

Locates the challenges within mental health and learning disability nursing, and in leadership and nursing imperatives for the future, supporting, and working in partnership with service users and stakeholders. The book focuses on concerns and challenges that impact on people with mental health needs and learning disabilities, and chapters emphasise clear clinical leadership and further integration and collaboration across services.

Transformational Leadership in Nursing (E-Book)

E Marshall

A guide for graduate students who are developing skills to fulfill the role of clinical leadership within a complex healthcare environment. Critical information and practical tools for leadership in a healthcare practice.

ABC of Clinical Leadership

T Swanwick

The *ABC of Clinical*

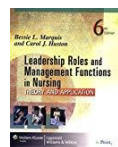

Leadership explores and develops the key principles of leadership and management. It outlines the scope of clinical leadership, emphasising its importance in the clinical context, especially for improving patient care and health outcomes in rapidly changing health systems and organisation

Compassionate Leadership: Sustaining Wisdom, Humanity and Presence in Health & Social Care

Michael A West

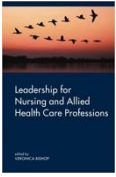

In these pages, an evidence-based approach to transforming the leadership and cultures of health and social care teams and organisations is described.

Leadership Roles and Management Functions in Nursing: Theory and Application

B Marquis and C Huston

This text uses application with theory and emphasizes critical thinking, problem solving, and decision making. Case study topics include acute and long-term care and community health. It addresses leadership development, staffing, delegation and ethics and law.

Leadership for Nursing and Allied Health Care Professions

V Bishop

This book helps nurses and allied health professionals develop their leadership skills and to make a difference to global health and social development. The author uses high profile historical case studies to illustrate the concept of leadership and put it into a context that is easily understood. The book demystifies key elements of leadership, highlights the difference between leadership and management and identifies the components for successful leadership among healthcare professionals.

The Fearless Organization

A Edmondson

This book explores this culture of psychological safety, and provides a blueprint for bringing it to life. The road is sometimes bumpy, but succinct and informative scenario-based explanations provide a clear path forward to constant learning and healthy innovation.
