# NURSE PRESCRIBING BOOKS

A selection of books from the Trust's Library Service

### Medicines Management for Nursing Associates

Christina Roulson

To help you master these skills, this book covers everything you will need to know in medicines management, from understanding the fundamental legal and professional requirements, to developing essential drug calculations skills

### Independent and Supplementary Prescribing

Molly Courtenay, Matt Griffiths

The book explores a number of key areas for prescribers, including prescribing within a multidisciplinary team context, consultation skills, ethical and legal issues surrounding prescribing, the psychology and sociology of prescribing, and applied pharmacology

### Oxford Handbook of Prescribing for Nurses and Allied Health Professionals

Sue Beckwith, Penny Franklin

This new edition features the most recent legislation and changes to prescribing standards, giving nurses and non-medical prescribers access to the most up-to-date information to inform their practice. There is also additional content on complementary and alternative medicine, and guidelines on prescribing for cosmetic effect.

### Rang & Dale's Pharmacology

James M Ritter

The fully revised 9th Edition keeps you up to date with all that's new in the field, including new and emerging drugs and recent studies. From cover to cover, you'll progressively increase your knowledge of all relevant aspects of pharmacology, from a molecular understanding of receptors and drug actions through clinical uses of key groups of drugs.

### Medicines Management for Nurses at a Glance

Simon Young, Ben Pitcher

An easy guide to the key pharmacological knowledge nursing students and registered nurses need. It introduces key topics in clinical pharmacology and medicines management including, numeracy, pharmacokinetics, routes of administration, and pharmacodynamics. It also covers the management of medicines for common conditions, drug interactions, side effects, and safe and effective prescribing.

### Prescriber's Guide: Stahl's Essential Psychopharmacology

Stephen Stahl

With the range of psychotropic drugs expanding and the usages of existing medications diversifying, we are pleased to present the Seventh Edition of the world's best-selling formulary in psychopharmacology. The new edition features nine new compounds as well as information about several new formulations of existing drugs.

## The Top 100 Drugs: Clinical Pharmacology and Practical Prescribing

Andrew Hitchings

Now in its third edition, this small and accessible guide contains essential information for the safe prescribing of the most commonly used drugs in the NHS. The Top 100 Drugs combines the best elements of a students' textbook with those of a prescribers' manual. It gives equal weight to essential information on the science of pharmacology as well as the real-world practicalities of prescribing, all in an accessible and clear format.

## Essentials of Pharmacology for Nurses

Paul Barber, Deborah Robertson

This ideal starter text for student nurses in pharmacology is now into its 4th edition. It makes pharmacology less intimidating by focusing on the knowledge needed at pre-registration level in order to safely and competently practice as a newly qualified nurse. Praised for its helpful layout and jargon-free language, this updated edition introduces pharmacology in a friendly, informative way, without assuming previous knowledge or a level of confidence in numeracy.

## Clinical Pocket Reference Practical Medicines Management

Charlottel Maddison

Now comprehensively updated and restructured in line with latest NMC Educational Standards for its Second Edition, this evidence-based resource: provides quick access to the knowledge you need to make clinical decisions and to safely deliver medication in partnership with patients.

## Medicines Management in Mental Health Nursing

Stan Mutsatsa

It is important that mental health nurses understand how psychiatric drugs work, what the common treatments are and appreciate the ethical and legal dimensions that affect how medicines can and should be used in mental health care. Using innovative activities and real-life case studies, this book has been carefully designed to provide all this and more.

## Bad Pharma: How Drug Companies Mislead Doctors and Harm Patients

Ben Goldacre

Medicine is broken. We like to imagine that it's based on evidence and the results of fair tests. In reality, those tests are often profoundly flawed. Dr. Ben Goldacre shows that the true scale of this murderous disaster fully reveals itself only when the details are untangled. He believes we should all be able to understand precisely how data manipulation works and how research misconduct on a global scale affects us.

## The Textbook of Non-Medical Prescribing

Dilyse Nuttall, Jane Rutt-Howard

A comprehensive overview of the essential knowledge, key issues and skills relevant to non-medical prescribing. Now updated and linked to the National Prescribing Centre Single Competency Framework for non-medical prescribers, with activities to help you link your continuing professional development within the competences required as a prescriber. This practical title remains an ideal resource for all qualified health professionals to practice safe and effective non-medical prescribing.

## Pathophysiology and Pharmacology in Nursing

Sarah Ashelford

Pathophysiology and Pharmacology in Nursing has

been carefully designed to provide an integrated introduction to both the biology of disease and the therapeutic agents that are used to manage them.

## Pharmacology Case Studies for Nurse Prescribers (e-book)

Donna Scholefield, Alan Sebti, Alison Harris

This new edition of the popular Pharmacology case studies for nurse prescribers has been thoroughly revised in the light of the latest research and guidance from NICE, the British National Formulary (BNF), the Royal Pharmaceutical Society, the Nursing and Midwifery Council and the Royal College of Nursing.

## Non-medical Prescribing in the United Kingdom

Penelope Franklin

This book explores key

developments in Non-medical Prescribing in the UK. Featuring chapters by clinicians, leaders and practitioners, it identifies current and potential future developments. Attention is paid to the prescribing practices and governance within the UK. Many lessons have been learned and this book shares these lessons, together with best practice examples in the implementation of nurse/health professional led patient care, patient centered practice, and governance. The book will be of interest to policy makers and practitioners in the European Health and Social Care market.

## Drug Calculations for Nurses: A Step-by-Step Approach

Robert Lapham

This new edition of Drug Calculations for Nurses teaches healthcare professionals how to perform drug calculations with confidence and competence. It provides step-by-step guidance to carry out accurate drug calculations, with units and drug strengths clearly explained.

## How Drugs Work: Basic Pharmacology for Healthcare Professionals

Hugh McGavock

This edition equips readers with a set of clear concepts for matching the pharmacology to the diagnosis, and has been revised and updated to reflect the latest knowledge and terminology. Rather than providing overwhelmingly comprehensive information, it condenses the aspects of pharmacology directly relevant to everyday practice, including the half life of drugs, patient non-compliance and severe chronic inflammation.

## Basic Pharmacology for Nurses

Bruce Clayton

Emphasizing the nurse's role, clear guidelines cover safe drug handling, types of drugs used for disorders or to affect body systems, injection and enteral administration, and patient education.

## Essential Medicines Management for Mental Health Nurses

Deborah Robertson

This text is an accessible and clinically practical guide to medicines management in mental health for all student nurses and professionals. Making the topic manageable and understandable at undergraduate nurse level, it also encourages a growing understanding beyond this in professional practice too.

## Introducing Pharmacology: For Nursing and Healthcare

Roger McFadden

This third edition of Introducing Pharmacology provides an accessible and engaging introduction to the subject of pharmacology for nursing and healthcare students – and anyone needing to refresh their knowledge of this important area.

## Nurses! Test yourself in non-medical prescribing

Noel Harris, Diane Shearer

A self-test resource for nurses studying for a prescribing qualification. With over 450 questions and full answers. Topics include: Pharmacology, Legal and ethical issues, Therapeutic decision making, Consultation skills, Principles of safe prescribing, Adverse drug reactions, Drug licensing and handling, Drug calculations.

## Numeracy in Nursing and Healthcare: Calculations and Practice

Pearl Shihab

If you need to brush up your maths skills, this is the perfect textbook to help you. It includes basic adding and subtracting and more advanced principles like SI units, drug administration, clinical measurements, and how to understand statistics.

## An Introduction to Psychopharmacology: Nurse Prescribing in the NHS (DVD)

Based on a series of lectures at Northampton University by Dr. Gray of the Institute of Psychiatry. Two DVDs with interactive questions. Five modules: The Brain; Neurotransmission; Neurotransmitters & Receptors; Basic Pharmacology.
