Psychosocial Interventions in Mental Health Nursing

Sandra Walker

In order to give high quality care it is essential that mental health nurses have a solid grasp of the most common therapies and interventions used in mental healthcare. If nurses understand what the various interventions involve then they will be much better equipped to support patients through their recovery. This is a practical, engaging introduction to the major psychosocial interventions that demonstrates to students what the interventions are, why they are important and how they can be used.

Applying the Roper-Logan-Tierney Model in Practice

Karen Holland

This is a new edition of a well-established textbook which demonstrates the theory and practice of one of the most popular models used in both university and clinical practice settings. Fully updated throughout, Karen Holland, Jane Jenkins and their colleagues explain how the *Roper-Logan-Tierney Model* can help today's student learn how to care for patients in a variety of health care contexts and use it as a framework for their nursing practice.

Clinically Oriented Anatomy

Keith L Moore

A popular resource for a variety of programs, this proven text serves as a complete reference, emphasizing anatomy that is important in physical diagnosis for primary care, interpretation of diagnostic imaging, and understanding the anatomical basis of emergency medicine and general surgery. The 9th Edition reflects the latest changes in the clinical application of anatomy as well as preparation for the USMLE while maintaining the highest standards for scientific and clinical accuracy.

Leadership, Management & Team Working in Nursing

Peter Ellis

With all nurses expected to demonstrate leadership, management and team working skills it is vital that students engage with this aspect of their training as early as possible. As well as covering all of the core theory and knowledge, the authors encourage the reader to explore their own values and experiences when it comes to leadership that will help to develop emotional intelligence and a solid understanding of how good leadership and management practice looks.

Fundamentals of Assessment and Care Planning for Nurses

Ian Peate

This timely publication adopts a practical approach with NMC

proficiencies at its core, providing guidance and insight into the application of key skills and demonstrating competency in real-life settings

Developing Practical Nursing Skills 4th Ed

Lesley Baillie

Developing Practical Nursing Skills, Fourth Edition helps you learn and perfect the practical skills required to become a qualified nurse. Patient-focused and adopting a

caring approach, this essential text will also help you to integrate nursing values alongside physical skills in your daily practice.

Qualitative Research in Nursing and Healthcare

Immy Holloway

An invaluable resource for those who carry out qualitative research in the healthcare arena. This new edition provides clear

explanations of abstract ideas in qualitative research as well as practical procedures. Structured into four sections, the book looks at the initial stages, methods of data collection, qualitative approaches and analysis of collected data. It also contains a chapter on writing up and publishing qualitative research.

Clinical Judgement & Decision Making in Nursing

Mooi Standing

Clinical decision-making is a fundamental part of professional nursing care and it is essential that students develop sound

judgement and decision-making skills in order to deal confidently with the challenges they will encounter as registered nurses. This book enables pre-registration nursing students to understand, develop and apply these skills in order to practise safely and effectively.

Reflective Practice in Nursing 5th Ed

Philip Esterhuizen

This book will build the reflective skills you need to succeed in your studies and to become a reflective

practitioner. Learn the principles of reflective practice and how to apply them, enhancing your personal and professional development and ultimately the care you provide.

Pathophysiology and Pharmacology in Nursing

Sarah Ashelford

Carefully designed to provide an integrated introduction to both the biology of disease and the therapeutic agents that

are used to manage them.

Assessment and Decision Making in Mental Health Nursing

Sandra Walker

This is a practical, hands-on guide to the assessment process,

underpinned by the latest evidence. The book explains the core principles through running case studies, so that readers can see how each decision they make impacts on the person in their care.

Dimond's Legal Aspects of Nursing 8th Edition

Richard Griffith

Written specifically for student nurses as well as those already in practice, *Dimond's Legal Aspects of Nursing* is your essential practical guide

to the legal principles you need to be aware of in your everyday nursing practice.

Understanding Research for Nursing Students

Peter Ellis

Get to grips with all aspects of research that you need to succeed in your nursing degree. Learn why research

is so important to nursing, develop your knowledge of key methods and terminology and build your confidence in applying research principles to your nursing practice.

Transition to Nursing Practice: from student to registered nurse

Angela Darvill

Moving from student to registered nurse is a big transition and it is important for final year

students to feel fully prepared for life after study. Covering a range of topics including accountability, professionalism, re-validation and fitness to practice, this text gives you a thorough overview of the responsibilities associated with being a fully qualified nurse.

Nursing: Decision-Making Skills for Practice

Karen Holland

Nursing: Decision-Making Skills for Practice is an essential guide for student nurses that prepares them to make effective decisions on the ward

and in the community.

Communication & Interpersonal Skills in Nursing

Alec Grant

A new edition of this well regarded book introduces the underpinning theory and concepts required for the development of first class communication and interpersonal skills in nursing.

Mental Health Medicines Management for Nurses

Stanley Mutsatsa

Provides nursing students with guidance on how to manage medicines safely and effectively when

treating patients with mental health conditions. It outlines how psychiatric drugs work, what the common treatments are, the ethical, legal, and person-centred aspects of working with psychiatric medicines, and how medicines can and should be used in mental health care.

Succeeding in Literature Reviews & Research Project Plans for Nursing Students

Graham R Williamson

Now in its fourth edition and thoroughly updated to ensure all content is mapped to the new

2018 NMC standards, this book is a practical and readable guide to undertaking a research project plan or a literature review for final year assessment.

What is Nursing?

Carol Hall

This book helps new nursing students, and those applying to nursing programmes, understand what being a nurse is all about. It explores the essential issues, processes and theories of nursing

practice, and is therefore an ideal introductory text as you start your nursing programme, or as pre-course reading.

Learning to Care: The Nursing Associate

Ian Peate

This exciting resource is designed to fully equip trainee nursing associates for their future role as professional

healthcare providers with chapters ranging from 'how to learn' and essay writing to communication skills, reflective practice, and the role of evidence-based clinical decision making.

Nursing Research: Methods and Critical Appraisal for Evidence-Based Practice

Geri LoBiondo-Wood

Become better at understanding and applying nursing research to

your everyday work with Nursing Research: Methods and Critical Appraisal for Evidence-Based Practice, 9th Edition.

Psychiatric and Mental Health Nursing in the UK

Katie Evans

Psychiatric and Mental Health Nursing in the UK is an adaptation of Australia and New

Zealand's foremost mental health nursing text and is an essential resource for both mental health nursing students and qualified nurses.

Nursing Adults with Long Term Conditions 3rd Ed

June Nicol

This book focuses on the relevant essential knowledge and skills, including the impact of

long term conditions across the lifespan, the therapeutic relationship, health promotion and empowerment, self-management, symptom management, case management and advance care planning.

Safeguarding Adults and the Law

Michael Mandelstam

Safeguarding Adults and the Law, now in its third edition, sets this complex area of work within an extensive legal framework and provides many useful pointers for

practitioners and students. It is now in an A-Z format, enabling quick reference to a wide range of civil and criminal law, and to legal case law.

Essentials of Nursing Research

Denise F Polit

This text suggests guidelines for the development of preceptor and mentorship skills within the health care profession. With the continuing changes in the profession and the need to recruit able

students for continuing care, preceptor and mentorship skills are becoming more important

Law and Ethics in Nursing and Healthcare

Graham Avery

Now in its second edition, *Law and Ethics in Nursing and Healthcare: An Introduction* continues to provide all the

information nursing and healthcare students need to know about 'what is legal' and 'how to decide what is right' in order to practise safely and ethically.

Ross & Wilson Anatomy and Physiology in Health and Illness

Anne Waugh

The book covers the core essentials of anatomy and physiology, including

basic pathology and pathophysiology of important diseases and disorders. This new edition presents additional illustrations to enhance understanding of key concepts, including pathophysiology and diagnostics.

Understanding Ethics for Nursing Students

Peter Ellis

Ethics have an significant impact on the decisions nurses make in their day-to-day work, so it's

important for all student nurses to develop their understanding of ethical frameworks as preparation for future practice.

Pocket companion for physical examination and health assessment

Carolyn Jarvis

A concise, practical handbook for the assessment lab and the clinical setting makes it fast and easy to review essential assessment skills and

techniques. This companion handbook is an ideal clinical tool whether you're a beginner who is learning health assessment skills or a practitioner who needs a portable reference.

Pocket Guide to Physical Assessment

Carol Lynn Cox

Pocket Guide to Physical Assessment is a compact yet comprehensive reference for students and practitioners alike,

employing a step-by-step framework for effective patient assessment, diagnosis and planning of care.

Patient Assessment and Care Planning in Nursing

Peter Ellis

This book introduces student nurses and novice practitioners to the assessment process,

enabling them to identify patient problems in order for solutions to be planned and implemented. It presents the different stages of the assessment process, taking a holistic and person centred approach throughout.

Nursing research : reading, using, and creating evidence

Janet Houser

An essential text for nursing students to build the skills necessary for translating research into evidence. The Fourth Edition focuses on the Nursing Practice Guidelines and emphasizes evidence-based practice in the profession of nursing.

Medicines management for nurses at a glance

Simon Young

The perfect companion for study and revision for pre-registration nursing and healthcare students. Combining superb full colour illustrations with accessible and informative text, it provides an easy-to-read and supportive guide to the key pharmacological knowledge nursing students and registered nurses need to know.

Law and professional issues in nursing

Richard Griffith

This book provides a crash course in law for nurses, written in clear and straightforward language. It is filled with insightful case studies and interactive thought provoking activities, helping you to understand the legal obligations you will face and ensuring that you are prepared for life as a practicing nurse.

Evidence-based Practice in Nursing

Peter Ellis

Written in clear, student-friendly language, this book builds your understanding of the terminology, theory and practice of using evidence. Learn how to evaluate different sources of evidence, apply this to your clinical decision making and, ultimately, contribute to an evidence-based culture in your workplace.

Clinical skills for nursing practice

Tina Moore

Designed to allow readers to develop and enhance their clinical skills with one key textbook, each chapter contains learning outcomes, recommendations for practice, case studies, activities, 'clinical significance' highlights and step-by-step guides to important procedures.

Essentials of Nursing Practice

Catherine Delves-Yates

This definitive textbook introduces the core topics and essential information that every nursing student will need to master during

their degree. Written by a diverse team of nursing educators from around the UK, with input from patients, practitioners and students, the book delivers a complete solution that challenges modern nursing practice and prepares students for the changing health needs of communities and individuals.

Developing person centred practice : a practical approach to quality healthcare

Jaqui Hewitt-Taylor

Provides a practice-focused case study based exploration of how the ideas of person-centeredness can be developed and incorporated in to everyday practice. This how-to guide supports person-centred care and reflects the challenges of implementing and pursuing this practice to make it a reality in healthcare.

Clinical skills for nursing adults : step-by-step

Wendy Wright

This pocket-sized book provides step-by-step instructions on how to carry out advanced clinical skills such as medicine

administration, giving transfusions, catheterisation, and other key skills across both acute and community settings. It is ideal for second and third year students and has been updated for the 2018 NMC standards, including the most up-to-date evidence base for the procedures.

The Handbook for Nursing Associates and Assistant Practitioners

Gillian Rowe

This bestselling book will see you through all aspects of your programme, from the skills and knowledge you need to get started through to more advanced topics such as leadership and pathophysiology. Covering all of the topics you will study in clear, straightforward language, it builds your confidence and competence as an effective healthcare professional.

How to Write Your Nursing Dissertation

Alan Glasper

Now in its second edition, this bestselling guide presents relatable and engaging scenarios to illustrate the setting of

standards, explore legal and ethical frameworks, examine auditing and benchmarking, and demonstrate how evidence is applied to real-world problems.

Theories for Mental Health Nursing

Theo Stickley

This book gives you the knowledge you need to understand those complex and varying theories, concepts and approaches. It helps you to deconstruct mental health and become a critical practitioner by drawing on a wealth of literature and research.

Critical Thinking & Reflection for Mental Health Nursing Students

Marc Roberts

The ability to reflect critically is a vital nursing skill. It will

help your students to make better decisions, avoid errors, identify good and bad forms of practice and become better at learning from their experiences.

Learning Skills for Nursing Students

Nicola Davis

This book helps students master the key learning skills they need to become successful learners throughout their degree and beyond. It clearly explains the core skills they will need right from the start of the course, such as writing and numeracy skills and how to organise studies.

Developing Practical Nursing Skills

Nicola Neale

Helps you learn and perfect the practical skills required to become a qualified nurse.

Adopting a patient-focused and caring approach, this essential text helps you integrate nursing values alongside physical skills in your daily practice.

A Handbook for Student Nurses

Wendy Benbow

Provides an introduction to the essential background knowledge that pre-registration nursing students need as a foundation for their training.
