Nursing Research: Methods and Critical Appraisal for Evidence- Based Practice

Gerri LoBiondo-Wood

Offers balanced coverage of both qualitative and quantitative research methodologies and an easy-to-read, easy-to-understand approach. This edition features new content on trending topics, including the Next-Generation NCLEX® Exam (NGN), as well as improved usability, user-friendly learning aids, and full-text research articles to help you better understand how to apply research to everyday clinical practice.

Succeeding in Literature Reviews and Research Project Plans for Nursing Students

Graham R Williamson

Now in its fourth edition and thoroughly updated to ensure all content is mapped to the new 2018 NMC standards, this book is a practical and readable guide to undertaking a research project plan or a literature review for final year assessment

Developing Effective Research Proposals

Keith F Punch

This new edition covers every section of the proposal, telling you all you need to know on how to structure it, bring rigour to your methods section, impress your readers and get your proposal accepted.

Bryman's Social Research Methods

Tom Clark

This edition features the insights of a panel of recent graduates from their experiences of researching a variety of fascinating topics, including attitudes towards the LGBT+ community on social media, the experiences of Pakistani Muslim single mothers, and the impact of screen time on sleep. 'Learn from experience' boxes in every chapter contain their candid reflections on the successes and challenges of their projects, and their advice for student researchers.

Making sense of research in nursing health and social care

Pam Moule

This introductory guide provides you with a concise overview of the different research methods and terminology that you will come across when undertaking research in any course related to nursing, health and social care. The book's easy-to-follow structure takes you from research novice to confident researcher, helping you to make sense of research and understand how it is implemented in healthcare practice.

Introducing qualitative research in psychology

Carla Willig

A vital resource for students new to qualitative psychology. It explains when each qualitative research method should be used, the procedures and techniques involved, and any limitations associated with such research. Throughout the new edition, material has been re-organized and updated to reflect developments in the field.

Essentials of Nursing Research: Appraising Evidence for Nursing Practice

Denise Polit

Give your students everything they need to actively learn how to apply research to nursing practice. Updated to reflect the latest innovations in research methods, this worldwide bestseller helps students learn how to read and critique research reports, speak the language of nursing research, and develop an appreciation of research to enhance nursing practice.

Qualitative Research in Health Care

Catherine Pope, Nicholas Mays

Now in its fourth edition, this concise, accessible, and authoritative introduction to conducting and interpreting qualitative research in the health care field has been fully revised and updated.

Continuing to introduce the core qualitative methods for data collection and analysis, this new edition also features chapters covering newer methods which are becoming more widely used in the health research field; examining the role of theory, the analysis of virtual and digital data, and advances in participatory approaches to research.

An Introduction to Qualitative Research (E-book)

Uwe Flick

The definitive guide to the full qualitative research process, from design to dissemination, this is everything you need to understand how good quality research is produced, and how to use and enrich your own work with it.

Social Research Methods

Alan Bryman

Bridging the gap between theory and practice, *Social Research Methods* is packed full of engaging examples and practical tips to equip students with the tools and knowledge needed for them to complete their own research projects. In addition to providing practical advice, Bryman deftly explores the nature of social research and the wider issues impinging on it.

Medical Statistics Made Easy

Michael Harris and Gordon Taylor

This is a practical guide to the use of statistics in medical literature and their application in clinical practice. The numerous examples help make the conceptualization of complex ideas easy. It is a great resource for healthcare students and clinicians in the field.

Statistics for Nursing Research

Susan Grove

Perfect for those seeking to more effectively build an evidence-based practice, this collection of practical exercises guides you in how to critically appraise sampling and measurement techniques, evaluate results, and conduct a power analysis for a study.

Real World Research: a Resource for Users of Social Research Methods in Applied Settings

Colin Robson

Contains timely coverage of contemporary methodologies, key ethical issues, and ongoing debates within the field of social research. New and expanded sections address topics such as evidence-based approaches to social research, ethical considerations when conducting research involving people, carrying out projects based solely on existing research, and the importance and implications of internet-based research.

Qualitative Research in Nursing and Healthcare

Immy Holloway and Kathleen Galvin

This book is intended to assist: Professionals and academics in healthcare who undertake or teach research in clinical or educational settings; Postgraduates undertaking qualitative research; and Undergraduates in their last year wishing to learn about qualitative perspectives. It reflects recent developments in nursing research and provides clear explanations of abstract ideas in qualitative research as well as practical procedures.

Research Methods in Clinical Psychology: An Introduction for Students and Practitioners

Chris Barker

An introduction to the various methods, approaches, and strategies for conducting research in the clinical psychology field. Ideal for students and practitioners who wish to conduct their own research or gain a better understanding of published research. Step-by-step guidance through all phases of a clinical psychology research project from initial concept and groundwork, through to measurement, design, analysis, and interpretation.

Doing a Literature Review in Health and Social Care: a Practical Guide

Helen Aveyard

This best-selling book is a step-by-step guide to doing a literature review for students in all areas of health and social care. It is vital reading for all those doing their undergraduate dissertation or any study that involves doing a literature review.

An Introduction to CBT Research

Sarah Rakovshik

This highly practical book will guide students through the different levels of research within CBT by addressing the general principles, how to understand statistics and tackling with general principles.

Nursing Research: Reading, Using, and Creating Evidence

Janet Houser

A foundational text for students which teaches the basics for creating and using evidence in nursing practice.

Nursing Research: Generating and Assessing Evidence for Nursing Practice

Denise F Polit

Nursing Research: Generating and Assessing Evidence for Nursing Practice, 10th Edition has been updated to incorporate new methodological advances and, to the extent possible, substantive examples used to illustrate concepts will be from articles published in 2013 to 2015.

Research Methodology: a step-by-step guide for beginners

Ranjit Kumar

This edition contains essential information for beginning researchers and it is presented in a clear and coherent way which engages the reader. The reader is carefully supported through references to research, questions posed and very well thought through examples.

Nursing and Healthcare Research at a Glance (E-book)

Alan Glasper, Colin Rees

Nursing and Healthcare Research at a Glance is perfect for nursing and healthcare students, as well as newly qualified practitioners and anyone looking for a refresher or introduction to research

Qualitative Methods for Health Research
Judith Green & Nisha Thangaraj

Qualitative Methods for Health Research

Judith Green

The book not only explains the theory of qualitative health research so you can interpret the studies of others, but also showcases how to approach, start, maintain, and disseminate your own research. It will help you: Understand the role of the researcher and develop an effective research.

Understanding Nursing Research: Building an Evidence-Based Practice

Susan Grove, Jennifer Gray

In examining your role in nursing research, the book provides a guide to quantitative and qualitative research, mixed methods research, and outcomes research, and makes it easier to understand key topics such as data measurement and the use of statistics in research.

Rapid Research Methods for Nurses, Midwives and Health Professionals

Colin Rees

This book aims to help you find and understand the meaning of key research terminology and develop your knowledge of the essential ideas and concepts they describe. This A-Z dictionary of terms is a collection of over 200 entries with a definition of each word put in context with additional tips on its use in assignment work.

An Introduction to Systematic Reviews

David Gough

This new edition carefully balances a need for insightful theory with real-world pragmatism; it introduces a wide range of cutting-edge approaches to research synthesis including text mining, living reviews and new ideas in mixed methods reviews such as qualitative comparative analysis.

Quantitative psychological research : the complete student's companion

David Clark-Carter

The book is designed for anyone learning to conduct quantitative psychological research. It covers the full research process, from the original idea to reporting the completed study, emphasising the importance of looking beyond statistical significance in evaluating data.

Understanding research for nursing students

Peter Ellis

Get to grips with all aspects of research that you need to succeed in your nursing

degree. Learn why research is so important to nursing, develop your knowledge of key methods and terminology and build your confidence in applying research principles to your nursing practice.

Research methodologies for beginners

Locharoenrat, Kitsakorn

Introduces the general points of view of research methodology in the scientific and engineering fields of studies and presents an overview of the technical and professional communication needed for article publication in journals.

Introduction to research : understanding and applying multiple strategies

Elizabeth Depoy

This clearly written, easy-to-understand book demystifies the research process and provides a rational foundation from which to critique and understand research designs and applications in health care and human service settings.

How to do a systematic literature review in nursing : a step-by-step guide

Josette Bettanysaltikov

This is a step-by-step guide to doing a literature review in nursing, or related healthcare professions, that takes you through every step of the process from start to finish.

From writing your review question to writing up your review, this practical book is the perfect workbook companion if you are doing your first literature review for study or clinical practice improvement.

BMJ research methods and reporting : reporting research

Adrian Hunnisett

A collection of articles previously published in the BMJ covering contemporary issues in research. The articles give key messages about the nuts and bolts of doing research, particularly with reference to statistical approaches, methods and interpretation.

Systematic approaches to a successful literature review

Andrew Booth

Packed with constructive tools, examples, case studies and hands-on exercises, the book covers the full range of literature review techniques.

Person-centred healthcare research

Brendan McCormack

Provides an innovative and novel approach to exploring a range of research designs and

methodological approaches aimed at investigating person-centred healthcare practice within and across healthcare disciplines.

Oxford handbook of clinical and healthcare research

Sumantra Ray

Providing a wide breadth of essential knowledge, this comprehensive text takes the researcher through the

steps from general good clinical practice in healthcare research to the process and management of research.

Nursing research : generating and assessing evidence for nursing practice

Denise F. Polit

The 10th edition has

been updated to incorporate new methodological advances and, to the extent possible, substantive examples used to illustrate concepts will be from articles published in 2013 to 2015.

Critical appraisal from papers to patient : a practical guide

Duncan Bootland

Written by clinicians, for clinicians this book takes the reader step by step

through the critical appraisal process so that any journal article can be easily read, evidence evaluated and the results - and their reliability - truly understood.

The doctor's guide to critical appraisal

Narinder Gosall

A comprehensive and up-to-date review of the knowledge and skills clinicians need to appraise

clinical research papers. Also includes excerpts from real clinical papers to illustrate key concepts.

The research process in nursing

Kate Gerrish

This established textbook reflects the significant advances in nursing research and

the importance of evidence-based practice, and provides an invaluable resource for both the novice and the more experienced researcher.

Research methods and statistics in psychology

Hugh Coolican

The book provides clear coverage of experimental, interviewing and observational methods, psychological testing, qualitative methods and analysis and statistical procedures which include nominal level tests, multi-factorial ANOVA designs, multiple regression, log linear analysis, and factor analysis. It features detailed and illustrated SPSS instructions for all these and other procedures, eliminating the need for an extra SPSS textbook.

Research methods in health : investigating health and health services

Ann Bowling

This bestselling book provides an accessible introduction to the concepts and practicalities of research methods in health and health services.
