Nurses and Nursing Students

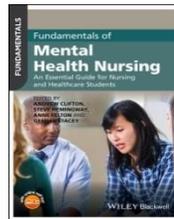

A selection of books from the Trust's Library Service

Communication & Interpersonal skills in nursing

Alex Grant

The new edition of this well regarded book will be useful to you for your entire course. It introduces the underpinning theory and concepts required for the development of first class communication and interpersonal skills.

Fundamentals of Mental Health Nursing

Andrew Clifton

This comprehensive overview explores concepts of mental health and distress, ethics and accountability, key nursing models to be aware of, and the prevalence, predisposing factors and features of the most commonly occurring mental health problems.

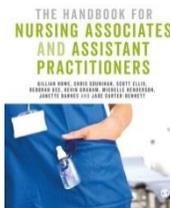

Clinical Skills for Nursing Practice

Tina Moore

Employing an evidence-based approach, this comprehensive textbook introduces the core clinical skills and competencies a

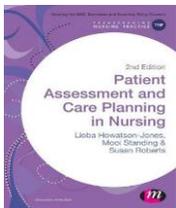

newly-qualified nurse is required to have for professional practice.

The Handbook for Nurse Associates and Assistant Practitioners

Gillian Rowe

Written specifically for students who are undertaking a foundation degree or higher level apprenticeship in healthcare practice, or for those studying for the new nurse associate role.

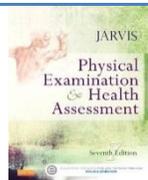

Patient Assessment & Care Planning

Lioba Howatson-Jones

This book introduces student nurses and novice practitioners to the assessment process

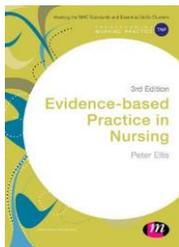

enabling them to identify patient problems in order for solutions to be planned and implemented.

Physical Examination & Mental Health Assessment

Carolyn Jarvis

Physical Examination & Health Assessment, 6th Edition offers a clear, logical, and holistic approach to physical exam across the lifespan. Detailed illustrations, summary checklists, and new learning resources ensure that you learn all the skills you need to know

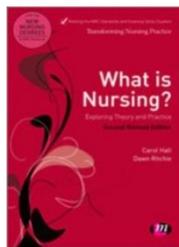

Evidence-based Practice in Nursing

Peter Ellis

This book guides nursing students through the process of identifying, appraising and applying evidence in nursing

practice. It explores a wide range differing sources of evidence and knowledge, and helps students to develop key skills of critiquing research and using evidence in clinical decision making.

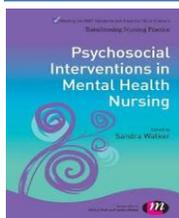

What is Nursing

Carol Hall

This book helps new nursing students, and those applying to nursing programmes, understand what being a nurse is all about. It explores the

essential issues, processes and theories of nursing practice, and is therefore an ideal introductory text as you start your nursing programme, or as pre-course reading.

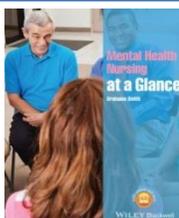

Psychological Interventions in Mental Health Nursing

Sandra Walker

In order to give high quality care it is essential that mental health nurses have

a solid grasp of the most common therapies and interventions used in mental healthcare. This is a practical, engaging introduction to the major psychosocial interventions that demonstrates to students what the interventions are, why they are important and how they can be used.

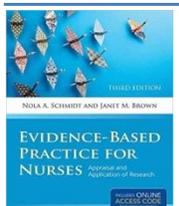

Mental Health Nursing at a Glance

Graham Smith

The ideal revision aid for pre-registration mental health nursing students, this accessible, easy-to-read title first explores the essential clinical

skills needed by nurses, using the Essential Skills Clusters as an organising framework. The second section goes on to look at common disorders and approaches.

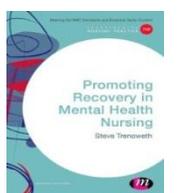

Evidence-based Practice for Nurses

Nola Schmidt

Evidence-Based Practice for Nurses: Appraisal and Application of Research, is

the definitive reference for transitioning research into nursing practice. Based on the innovation-decision process (IDP), each unit is shaped according to the five steps of the IDP: knowledge, persuasion, decision, implementation, and confirmation.

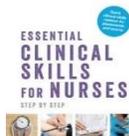

Promoting Recovery in Mental Health Nursing

Steve Trenoweth

Promoting recovery from mental health problems is a guiding principle within

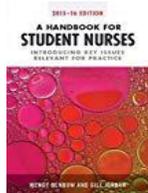

modern mental health care. Working in partnership with service users, new practice techniques are being designed and delivered that can allow individuals to thrive within society and move towards a fulfilling life beyond their diagnosis.

Essential Clinical Skills for Nurses

Catherine Delves-Yates

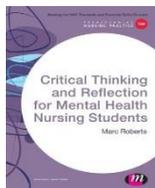

This book is a clinical skills reference for nursing students and junior health care practitioners. Its step-by-step approach allows for information to be accessed quickly to help students review skills while on placement and prepare for their OSCE exams.

A Handbook for Student Nurses

Wendy Bembow

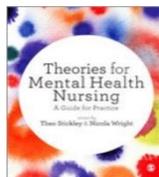

The book provides an introduction to the essential background knowledge that pre-registration nursing students need as a foundation for their training.

Critical Thinking & Reflection for Mental Health Nursing Students

Marc Roberts

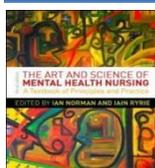

The ability to reflect critically is a vital nursing skill. It will help your students to make better decisions, avoid errors, identify good and bad forms of practice and become better at learning from their experiences.

Theories for Mental Health Nursing

Theo Stickley

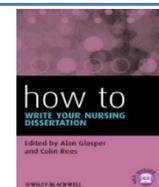

This book gives you the knowledge you need to understand those complex and varying theories, concepts and approaches. It helps you to deconstruct mental health and become a critical practitioner by drawing on a wealth of literature and research.

The Art & Science of Mental Health Nursing: Principles and Practice

Ian Norman

This well-established textbook is a must for all mental health nursing students. Comprehensive and broad, it explores in detail the many ways in which mental health nursing can have a positive impact on the lives of those with mental health problems.

How to Write Your Nursing Dissertation

Colin Rees

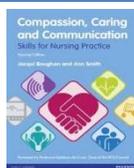

This nursing textbook provides a clear guide to writing a dissertation. It contains advice and guidance for overcoming many of the difficulties students face in this process. Written by experts in the field, each chapter provides scenarios with effective solutions and clear principles to follow to answer the issues raised.

Assessment & Decision Making in Mental Health Nursing

Sandra Walker

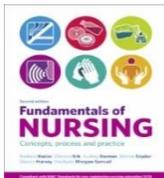

Assessment is an essential part of mental-health nursing and as such a core learning requirement for pre-registration nursing students. Getting assessment right is essential for the nursing student in order for them to become an effective practitioner.

Compassion, Caring, and Communication

Jacqui Baughan

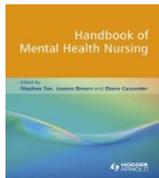

Compassion, Caring and Communication: Skills for Nursing Practice is a practical book that guides you through the complex dimensions of caring. Using real-life narratives, case studies and reflection activities.

Fundamentals of Nursing: Concepts, Process and Practice

Barbara Kozier

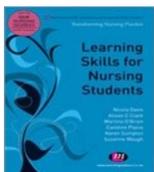

This book considers nursing across all fields from Adult, to Child, Mental Health and Learning Disabilities as well as both within the acute and community settings.

Handbook of Mental Health Nursing

Stephen Tee

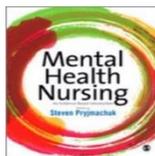

A concise and user-friendly guide, Handbook of Mental Health Nursing helps nursing students learn the essential skills required for practice. This practical handbook is informed by an interdisciplinary understanding of mental health problems and the recovery from mental health difficulties.

Learning Skills for Nursing Students

Nicola Davis

This book helps students master the key learning skills they need to become successful learners throughout their degree and beyond. It clearly explains the core skills they will need right from the start of the course, such as writing and numeracy skills and how to organise studies.

Mental Health Nursing: An Evidence-Based Introduction

Steven Prymachuk

Mental Health Nursing is a practical, values- and evidence-based resource which will guide and support you through your pre-registration mental health nursing programme and into your own practice.
