Training on Demand

Access Information skills training, tailored to your needs!

All training options can be delivered in person or remotely

- **Finding Evidence (75 Minutes)**

This session introduces the process of literature searching using the NHS Healthcare Advance Search method and covers tasks such as database selection and creating an effective search strategy.

Locating quality evidence-based literature to support your patient care or research needs.

- **Reference Management Tools (60 Minutes)**

Find out how to use a reference management tool to organise your research. The session covers such procedures as importing citations from databases to the reference management tool and creating a list of references in a reference style; Harvard, APA etc.

- **A Brief Introduction to Critical Appraisal (90 Minutes)**

Presenting an overview of the critical appraisal procedure, this brief workshop includes an introduction to the key study designs used within clinical research and how to appraise a paper.

- **Surfing for Health (60 Minutes)**

An introduction to online health information sources for personal health and wellbeing. Evaluating and navigating resources and locating quality patient focused health information.

All the above sessions are available either as a 1-2-1 or group.
